

# SOCIOLOGY OF SEXUALITY

GNDR\_ST 490 / SOCIOL 476

This graduate seminar asks the following questions: What do we learn about society by studying sexuality? What do we learn about sexuality by studying society? We will focus on sociological approaches to studying sexuality and link sexuality studies to broader sociological questions about culture, social interaction, social inequality, globalization, social movements, science, health, political economy, and public policy. We will explore various theoretical and methodological approaches that have been used in sociological studies of sexuality—including those that guide sexuality-related analyses of meanings and identities, practices and behaviors, politics, power, relationships, population movement, collective identities and social movements, globalization, place and space, and morality and social control.
